# Approval of Proposals from NCADAC Working Groups

**NCADAC Meeting**
November 16-17, 2011

Jerry Melillo, Chair

# WG#6: Information Quality Assurance

- Requests approval of the approach described in the "general principles used in the development of guidance for assuring information quality in the National Climate Assessment" document.

**National Climate Assessment**
U.S. Global Change Research Program

NCADAC Meeting, November 16-17, 2011

# WG#10: Climate Change Science

- Requests approval of  the development of a climate science frequently asked questions document to be published online.

**National Climate Assessment**
U.S. Global Change Research Program

# WG #13: Indicators Development and Evaluation

- Requests the approval of the approach to developing indicators described in the "NCA Indicator Vision" document.

**National Climate Assessment**

U.S. Global Change Research Program

# WG#15: Sustained Assessment

- Requests that the NCADAC review and approve the Sustained Assessment scope and approach as described in the 4-page white paper.

**National Climate Assessment**

U.S. Global Change Research Program

# Executive Secretariat/
# WG#12: Adaptation and Mitigation

The ES proposes the following for NCADAC approval

- Decision support chapter: to frame the connection between science and decision making processes – incl. model / tools

- Adaptation chapter: will include some description of the intersection with mitigation

- Mitigation chapter: will include some description about the intersection with adaptation.

- Connections would be drawn among these chapters

Next steps:

- Refine the scope of the three chapters

- Identify CLAs and LAs for the two new chapters
